

**Statement Regarding Carbon Border Adjustment Mechanism (CBAM) Compliance**

We would like to inform you that Ruland does not offer products that fall within the designated HTS codes subject to the Carbon Border Adjustment Mechanism (CBAM).

As a result, Ruland is not obligated to comply with the requirements of CBAM, as our product range is not included within the scope of the mechanism. You can find applicable CBAM HTS codes here, [CBAM CN Codes](#).

If you require any further clarification or have additional inquiries, please do not hesitate to contact us.

Thank you,

*Dustin Vinci*
